

Arduino Nano Port Issue

If Nano is not recognized by your computer

The reason why your computer didn't recognize arduino nano is because the one you are using is not officially supported by Arduino IDE. You need to install a driver in order to make it work.

1. Window

- Download website: http://www.wch.cn/download/CH341SER_EXE.html
- Directly download here: <http://www.wch.cn/downloads/file/65.html>

2. Mac

- Download website: http://www.wch.cn/download/CH341SER_MAC_ZIP.html
- Directly download here: <http://www.wch.cn/downloads/file/178.html>
- **IMPORTANT**: Once the driver is properly installed, please enter "System Preferences" -> "Security & Privacy" -> "General" page, below the title "Allow apps downloaded from:" click on the company's name to allow the driver to run.
